📁 EXPERIENCE

- Medida AI, Computer Vision Engineer** 08/2024 – Present
- Built the core 3D reconstruction pipeline guaranteeing **6mm** measurement accuracy
 - Built **custom SLAM system** for user scanning guidance
 - Led the project for accuracy QA automation
- Gracia AI, Machine Learning Engineer** 03/2024 – 07/2024
- Applied state-of-the-art tech to enable reconstruction & rendering of **>10x** larger 3D environments
 - Shipped **1.5x** FPS improvement for edge devices
 - Implemented in-house MLOps system
- Clostra, Machine Learning Researcher** 04/2022 – 03/2024
- Optimized pipeline requirements by integrating GANs / *Diffusion Models* for **3D generative fill**
 - Applied state-of-the-art research to 3D reconstruction of **full-body avatars**
 - Improved 3D reconstruction pipelines with segmentation / object detection / depth estimation
- 3D Smile, Machine Learning Engineer** 07/2020 – 04/2022
- Improved core model accuracy & performance, leading to **2x throughput**
 - Developed internal *MLOps* system for training & deploying models
 - Shipped new AI models assisting in treating patients' teeth
- Socinform, Software Developer Intern** 12/2019 – 04/2020
- Implemented system for fast fuzzy-search over a large database of brand names in **.NET**
- FunExpected, Game Developer Intern** 06/2018 – 08/2018
- Developed an educational game in **Godot Engine**

🎓 EDUCATION

Applied Mathematics and Informatics, Bachelor of Science 06/2024 | Moscow, Russia

🧠 SKILLS

C++ | Python | Swift | Rust (self-taught)

🌐 LANGUAGES

Russian: Native | **English:** Fluent |
Hebrew: Conversational

📁 INTERESTS

Teaching

Led lectures & seminars on Computer Vision at a local Hackerspace

Recorded lectures: <https://www.youtube.com/playlist?list=PLV30o7re7MVb5Rep09niHU4JILXRgxfei> 📄

Second Brain / Obsidian

I've been obsessed with **optimal learning** since my early student years.

I use my Obsidian vault as my Second Brain, accompanying every one of my learning journeys.

I've written about my method: <https://xallt.dev/posts/obsidian-useful-scripts/> 📄
